RP-32DE

Experience the difference

Thank you for very much for your long-standing continuous support.  
We are very glad to announce that STOLZ will take part in IPF Japan 2023 (International Plastic Fair).  
Because this year's IPF will be the first face-to-face exhibition in recent six years, we are planning much more energetic exhibition than ever before.

- The granulated materials can be reused without degrading the resin properties. "Re-pellet system"
- Remote control of the entire plant from anywhere in the world. "K's net system"
- Information model of global standard OPC-UA communication.  
"EUROMAP"-compliant mold temperature controllers"

We introduce you a new technologies that will sustain the future of manufacturing.

We are looking forward to seeing you at out STOLZ booth No.12202 during IPF 2023.
